# Q&A Webinar

June 26, 2024 @ 1:00 PM EDT

Please submit your questions in the “Q&A” box  
(scientific inquiries will not be discussed)

**NIH DIRECTOR'S**

**EARLY  
INDEPENDENCE  
AWARD**

National Institutes of Health  
Office of Strategic Coordination - The Common Fund

[commonfund.nih.gov/earlyindependence](https://commonfund.nih.gov/earlyindependence)  
[earlyindependence@od.nih.gov](mailto:earlyindependence@od.nih.gov)

This webinar is being recorded.

# Q&A Webinar

- Submit questions in the “Q&A” box
- Scientific or situationally specific questions will not be discussed (email us)
- For additional questions, contact us at [EarlyIndependence@od.nih.gov](mailto:EarlyIndependence@od.nih.gov)
- Webinar recording & slides will be posted on website at [commonfund.nih.gov/earlyindependence](http://commonfund.nih.gov/earlyindependence)
- For more application guidance, see our Application & Award Guide on website (includes example applications)

**NIH DIRECTOR'S**

**EARLY  
INDEPENDENCE  
AWARD**

National Institutes of Health  
Office of Strategic Coordination - The Common Fund

# Panelists

Trish Labosky, Ph.D.

Program Leader  
Office of the Director

Brittany Mason-Mah, Ph.D.

Scientific Review Officer  
Center for Scientific Review

Becky Miller, Ph.D.

Program Officer  
Office of the Director

# Breadth of Common Fund Programs

*27 Programs in 3 Broad Categories*

## Transformational Science and Discovery

*New scientific principles, models, and research resources*

- 4D Nucleome
- A2CPS
- CryoEM
- DS-I Africa
- ExRNA
- Global Health
- HRHR
- Human Virome
- IDG
- MoTrPAC
- NPH
- SMaHT
- SPARC
- Oculomics

## Re-Engineering the Research Enterprise

*New approaches to conducting research, translating research into interventions, and supporting a robust workforce*

- ComPASS
- DPC
- FIRST
- SCGE
- UDN
- Complement-AIRE
- Transformative Research to Address Health Disparities and Advance Health Equity

## Catalytic Data Resources

*Data resources to accelerate discovery*

- Bridge2AI
- CFDE
- HuBMAP
- Kids First
- Metabolomics
- SysBio

**CF programs may be useful for your research: funding opportunities, access to high-end instruments, databases, reagents, protocols, ....**

# High-Risk, High-Reward Research Program

*Supporting scientists at all career stages proposing outstanding high-risk, high-impact research*

# High-Risk, High-Reward Research Program

Annual funding opportunities

# High-Risk, High-Reward Research Program

High-risk, high-impact ideas

# High-Risk, High-Reward Research Program

No preliminary data or detailed experimental plan required

# High-Risk, High-Reward Research Program

*Any topic relevant to NIH mission welcome*  
Behavioral, social, biomedical, applied, and formal sciences,  
and basic, translational, or clinical research

# High-Risk, High-Reward Research Program

Encourage applications from investigators with diverse backgrounds and from the full spectrum of eligible institutions

# HRHR Working Group

## Chair

Tara Schwetz (OD)

## Program Leader

Trish Labosky (OD)

## Members

Kristin Abraham (NIDDK)

Hugh Auchincloss (NIAID)

Geetha Bansal (FIC)

Alexey Belkin (NIAMS)

Sangeeta Bhargava (NEI)

Rebecca Black (OD)

Gene Carstea (CSR)

Jennifer Collins (NIEHS)

Christine Colvis (NCATS)

Bill Duval (NINR)

Emmeline Edwards (NCCIH)

Zeynep Erim (NIBIB)

Rene Etcheberrigaray (NIA)

Asanté Forde (OD)

Nancy Freeman (NIDCD)

Brionna Hair (OD)

April Harrison (NIDCR)

Gabriel Hidalgo (NIDCR)

Dana Hill (CSR)

Sharon Isern (CSR)

Ray Jacobson (CSR)

Susan Koester (NIMH)

Trish Labosky (OD)

James Li (CSR)

Roger Little (NIDA)

Brittany Mason-Mah (CSR)

Becky Miller (OD)

Brett Miller (NICHD)

David Miller (NCI)

Michael Morse (OD)

Ellie Murcia (OD)

Imoh Okon (CSR)

Michael Pazin (NHGRI)

Steven Pittenger (NCATS)

Josh Powell (CSR)

Ananda Roy (OD)

Diana Rutberg (NIDCR)

John Satterlee (NIDA)

Dana Schloesser (OD)

Tara Schwetz (OD)

Stefania Senger (CSR)

Doug Sheeley (OD)

Carol Shreffler (NIEHS)

Lillian Shum (NIDCR)

Elena Smirnova (CSR)

Barbara Sorkin (OD)

RV Srinivas (NIAAA)

Nathaniel Stinson (NIMHD)

Meryl Sufian (NLM)

William Tyler (NINDS)

Stephanie Webb (NHLBI)

Ariel Zane (NIGMS)

# Best tip...

Read the entire funding opportunity ([RFA-RM-24-005](#)).

- Follow the instructions in the [SF424 \(R&R\) Application Guide](#), except where the funding opportunity provides alternate instructions.
- Funding opportunity instructions supersede SF424 instructions.

# High-Risk, High-Reward Research Program

NIH DIRECTOR'S

EARLY  
INDEPENDENCE  
AWARD

Enables outstanding early career scientists to move rapidly into independent research positions by skipping the traditional postdoc

- Single PI applications only
- Complete terminal research degree or clinical training between May 1, 2023, and September 30, 2025
- No previous postdoc experience >12 months
- In non-independent position at time of application
- Requires independent position from host institution
- Limit of 2 applications per institution
- Commit 9.6 months each year to research for first 2 years
- Awards up to \$250,000 per year for 5 years
- Site visit in first year

# DP5 Application

<b>Application Limit</b>	2 applications per institution
<b>Research Strategy Essay</b>	12 pages: <ul style="list-style-type: none"><li>• Scientific challenge and significance</li><li>• Innovativeness of approach</li><li>• Investigator's qualifications</li><li>• Plans for development</li></ul>
<b>Facilities &amp; Other Resources</b>	Institutional support detailed
<b>Budget Information</b>	Modular budget
<b>Letters of Collaboration</b>	Should be included
<b>Biosketch</b>	Only PI's is allowed
<b>Research Effort</b>	9.6 months per year for first 2 years
<b>Letters of Reference</b>	3-5 required

# Select Scientific Areas

- Primary (required) and secondary (optional)
  1. Behavioral and Social Science (BSS)
  2. Chemical Biology (CB)
  3. Clinical and Translational Research (CTR)
  4. Infectious Diseases and Immunology (IDI)
  5. Instrumentation and Engineering (IE)
  6. Molecular and Cellular Biology (MCB)
  7. Neuroscience (NS)
  8. High-Throughput and Integrative Biology (HIB)
  9. Bioinformatics and Computational Biology (BCB)
- Indicate on “SF424 (R&R) Cover Form” in Agency Routing Identifier

# Facilities & Other Resources (Institution)

- Important section that should not be overlooked
- Tailor to candidate and avoid overuse of boilerplate language
- Provide context for reviewers
- Answer questions in the following headings:
  - ***Candidate selection process*** – process and criteria to select candidate
  - ***Position details*** – description of the position
  - ***Institutional resources commitment*** – description of the lab space, office space, facilities, supplies, equipment, administrative staff, support staff, additional funds, etc. provided by the institution
  - ***Institutional career development*** – plans to ensure independence, mentorship, integration into community, resources, other opportunities

# Specific Aims

- Distillation of proposal into one page
- Use the following headings:
  - ***Research Objectives*** – describe research project and overall approach
  - ***Institutional Support*** – how will institutional support allow you to accomplish your research objectives
  - ***Early Independence Rationale*** – what qualifications, experience, and skills do you have that will allow you to accomplish your research objectives

# Research Strategy Essay

Use following headings (12-page limit):

1. Rationale for omitting postdoc
2. Evidence of transition to independent position
3. Career development plan
4. Evidence of leadership
5. Host institution interactions
6. Research challenge
7. Approach
8. Innovation
9. Relationship to previous work
10. Timeline

# Points to Consider

- Convince reviewers that you:
  1. Are ready for independent research
  2. Will have the resources and support needed to succeed
  3. Have a significant research topic and innovative approach to addressing it
- Make reviewers feel confident that you are ready and prepared to begin your independent research career
- Given the review process, be sure your application can be easily appreciated by people well outside the field (watch out for jargon) and provide context
- Though no preliminary data are required, convince reviewers that you have thought deeply about the project — identify risky aspects, how they will be mitigated, alternate approaches
- Convince reviewers that the research will be performed in a robust and rigorous manner — validate new approaches, provide estimates of numbers of human or animal subjects (if used) and why, include that sex will be considered as a biological variable (if appropriate)

# Data Management & Sharing Plans

Plans should explain how scientific data generated by the research project will be managed and which scientific data and metadata will be shared

- Attach in “Other Plan(s)” section in “PHS 398 Research Plan Form”
- Recommended not to exceed two pages
- Include:
  - Data type
  - Related tools, software, and/or code
  - Standards
  - Data preservation, access, and associated timelines
  - Access, distribution, or reuse considerations
  - Oversight of data management and sharing
- Include costs in budget and justify in “Additional Narrative Justification” in “Modular Budget Form”
- Budget considered by reviewers & plan reviewed by NIH program staff
- Adjustments made through Just-in-Time (JIT) process
- Becomes part of Terms & Conditions of award
- Go to [sharing.nih.gov](https://sharing.nih.gov) for more information & examples

# Early Independence Award (DP5) Review Procedures, 2024-2025

**Brittany Mason-Mah, Ph.D**

Scientific Review Officer

Center for Scientific Review

National Institutes of Health

[Brittany.mason-mah@nih.gov](mailto:Brittany.mason-mah@nih.gov)

# Multi-Stage Review Process

Stage 1: Subject Matter  
Expert Mail Review

Stage 2: Editorial Board  
Review

*Applications then move  
on to Program for  
additional considerations*

# Review Stages

- Receipt of applications:  
September 6, 2024
- Stage 1 Review by Subject Matter Experts:  
October-December 2024
- Editorial Board consideration:  
January-February 2025
- Discussion and final scores by Editorial Board:  
March 2025
- Recommendation by Council of Councils, NIH:  
May 2025

# General Review Considerations

- It is understood that the Principal Investigator is at a very early stage of research career and that substantial preliminary data are not required.
- The intent of the award is to enable the Principal Investigator to start a productive, independent research career and have a significant impact on the field.
  - This is a big step to skip over postdoctoral training. It is essential that your readiness for this step be clear.
- **Focus on the promise of the investigator**
  - **Biosketch** and **Letters of Reference** are critical sources for evaluating the prospects and promise of the investigator.
- **Institutional support and commitment**
  - Specific details from the “facilities and other resources” section
  - Letters of support
- **Significance, innovation and approach of the science**

# How Applications are Scored

- Overall impact score (1-9)
  - 1 indicates having the highest likelihood to make an impact, “the best”
- Five criteria (also on 1 to 9 scale):
  - Significance
  - ***Investigator***
  - Innovation
  - Approach
  - ***Environment***

# Stage 1 Review – Subject Matter Experts

- All applications are reviewed in one Special Emphasis Panel.
- All CSR review branches participate in assigning expert reviewers to applications based on the appropriate scientific areas.
- Each application is assigned to three Stage 1 reviewers who are Subject Matter Experts; they provide full written critiques and scores.
- The primary focus is on the science.

# Stage 2 Review - Editorial Board

- The Board includes senior scientists with broad expertise.
  - Scientific areas initially identified by PI during application submission are useful in assigning Editors.
- Each Editor is assigned ~12-15 applications after Stage 1 review is completed.
  - Editors review applications *and* the Stage 1 critiques, and assign an overall impact score to each application, using the 1-9 scale.
  - Editors do not write critiques.
- Board meets in March to *discuss approximately top 50% of applications*.
  - 3 assigned reviewers present the application; all members discuss and score application.
- **Editorial Board scores represent the final scores for the application.**

# Board Considerations

- Has the Principal Investigator demonstrated the scientific creativity, intellectual sophistication, and the appropriate skills to launch a vigorous, independent research program?
- Will this award accelerate the candidate's research trajectory?
- Has the host institution committed to providing the Principal Investigator scientific freedom, necessary resources, collaborating faculties, protected time, and appropriate support to develop an independent research program?
- How compelling is the evidence that the project could exert a sustained impact to the field?

# Following the Review

- Applicants receive scores within 3-5 business days (in eRA Commons).
  - For *discussed* applications, a final score will be listed.
  - For *non-discussed* applications, no score will be listed; it will say “Not Discussed.”
- All applicants receive summary statements within 30 days.
  - Discussed applications receive a resume/summary of the Editorial Board discussion and critiques from the Stage 1 reviewers.
  - Non-discussed applications receive the critiques from the Stage 1 reviewers.

# Tips for Applicants

- Be *very specific* in the institutional support provided.
  - Provide evidence that the position & resources are sufficient for the project.
- Letters of reference should not sound generic. Advise letter writers to comment on what makes you unique and ready to take on this next step in your career.
- Some scientists who evaluate your application may not be from your field but will understand the challenges of doing research.
  - Clearly articulate the significance of your research and how it will advance science.
  - Set reasonable specific aims that can be accomplished within the project resources. Discuss plans to manage problems, long term goals, or next steps.
