

Bringing an Experimental Medicine Approach to Behavior Change Research: A Hands-On Introduction to the NIH Science of Behavior Change Program and Its Method

Thursday, May 25 at 9:00 AM – 1:00 PM

Jennifer A. Sumner, PhD
Columbia University Medical Center

Donald Edmondson, PhD, MPH
Columbia University Medical Center

The NIH Science Of Behavior Change (SOBC) program uses an experimental medicine approach to elucidate how behavior change works, and funders across the NIH are moving to require the use of the experimental medicine approach for mechanistic research. In this workshop, attendees will learn about SOBC and engage with the experimental medicine method in a hands-on way. *(Space for this free workshop will be limited and available on a first-come, first-serve basis).*

[Click here to register](#) for the 29th APS Annual Convention in Boston, MA, May 25-28, 2017. **When you register, be sure to sign up for our free workshop.** NOTE: If you have already registered for the convention and would like to retroactively sign up for our workshop, please email convention@psychologicalscience.org for assistance.
