

We are the Common Fund

We've got a burning thirst for knowledge
We've had it ever since we went to college
Getting riled
By clinical trials
We are the Common Fund

We're changing how you do
The state of research through and through
We said yeah
Tired of all these bad diseases

We want to make the science easy
That's why we
Keep chasing this dream
We are the Common Fund

We'll fund your science project
Leaving all of these roadblocks wrecked
We said yeah

We're making changes happen oh so fast
And we're making sure they're going to last
We're not doing this to get wealthy
We just want to make everyone healthy

We are the Common Fund
We are the future of clinical science
We hope you'll join in this grand alliance
We said yeah

Oh yeah oh yeah oh yeah!
